Roadmap

FROM FOUNDATION TO ECOSYSTEM

An AI workspace with a soul — Amara the companion, Stacey the doer — built in the open with the people who shape it. This is where we are, and where we are going.

Every phase ships something real and is shaped by our testers. The first 100 builders don't just try the product — they decide who becomes a Genesis Founder and which cards are minted.

Q2 2026

Phase 0 — Foundation COMPLETE

- Sovereign infrastructure — **aiiafable.com**, HTTPS, permanent tunnel.
- Telegram Mini App — the face of Fable, fullscreen.
- **Amara** (companion) & **Stacey** (doer) with intelligent agent routing.
- Two-counter **Diamond economy** (earned vs. wallet — no pay-to-win).
- Per-user **Google Drive memory** — user-owned, isolated.
- Founder & Genesis framework, in-app onboarding.

29 JUN – 9 JUL 2026

Phase 1 — Public Beta LIVE

- First **100 testers**. A 10-day Beta Challenge: daily check-in, card voting, tasks, a timed Amara session.
- Live **leaderboard** & the **Genesis Founder** competition.
- Competition starts officially **29 June, 23:59** — prep is open before; rankings count only from the start.
- Bug reports (+100💎) and accepted ideas (+500💎) shape the build.

1 AUGUST 2026

Phase 2 — Genesis Mint

- The first **100 Tester Pass NFTs** minted on **Base**.
- **Top 15 Amara** + **Top 15 Stacey** cards minted as NFTs, together with the passes.
- Right-to-mint earned through in-app holdings — no minting during the beta.
- Genesis Founders receive their badge, Pass NFT, and bonus.

Q3 2026

Phase 3 — Memory & Scale

- Production **memory persistence** — no conversation, file, or memory ever lost; 300+ testers.
- **Multi-agent execution** — Amara orchestrates specialists behind one voice.
- **Discord** community and broader public rollout.

Q4 2026

Phase 4 — Ecosystem

- Expansion ladder — Discord → wider audiences.
- More agents and archetypes; deeper Drive intelligence.
- Creator & collector economy around the card collections.

2027 & BEYOND

Phase 5 — Sovereign AIIA

- Thousands of users on user-owned memory.
- Deliberate archetype expansion — the AIIA ecosystem.
- Intelligence with continuity, owned by the people who build it.

Dates are targets, not promises — but the direction is fixed: a premium AI workspace, built in the open, owned with its community.
